

DATA SHEET

Product overview

Name	CELT-211
Short description	Potent and selective h5HT _{2B} Serotonin receptor fluorescent ligand
Biological description	It shows full selectivity for h5HT _{2B} over h5HT _{2A_v} , h5HT _{2C} (only in the h5HT _{2B} receptor it is possible to measure a K _i whose value is 56.32 nM in radioligand binding assay).
Biological action	Selective orthosteric ligand
Quantity	10 µg
Purity	> 95%

Properties

Molecular Weight	1330.22 (TFA salt)
Source	Synthetic
Appearance	Purple solid
Formulation	Lyophilized solid
Excitation	589 nM
Emission	616 nM
Pharmacological validation	The efficacy and potency of CELT-211 as a h5HT _{2B} fluorescent ligand was confirmed by a radioligand binding assay.

Storing and Using product

Storage instructions	-20 °C (protect from light)
Solubility overview	Soluble in DMSO
Stock solution	Add 75 µL of assay buffer containing 1% of DMSO to obtain a 100 µM stock solution.
Handling	After thawing individual aliquots for use, we recommend briefly sonicating the sample to ensure it is fully dissolved and the solution is

homogeneous. We do not recommend using the product after subjecting it to repetitive freeze-thaw cycles.

Shipping conditions The product, as a solid, is stable at ambient temperature for periods of up to a few days and does not require shipping on ice/dry ice.

Important This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not for human or veterinary use.
