

## DATA SHEET

### Product overview

Name	CELT-331
Short description	Potent and selective hCB <sub>2</sub> Cannabinoids receptors fluorescent ligand
Biological description	It shows full selectivity for CB <sub>2</sub> over CB <sub>1</sub> (only in the CB <sub>2</sub> receptor it is possible to measure a K <sub>i</sub> whose value is 75.9 nM in radioligand binding assay).
Biological action	Selective orthosteric ligand
Quantity	10 µg
Purity	> 97%

---

### Properties

Molecular Weight	1319.66
Source	Synthetic
Appearance	Dark blue solid
Formulation	Lyophilized solid
Excitation	646 nm
Emission	662 nm
Pharmacological validation	The efficacy and potency of CELT-331 as a hCB fluorescent ligand was confirmed by a radioligand binding assay.

---

### Validated applications

High content screening	CELT-331 has been validated in High content screening binding assays using HEK cell lines expressing CB <sub>2</sub> .
------------------------	--

---

### Storing and Using product

Storage instructions	-20 °C (protect from light).
Solubility overview	Soluble in DMSO.

Stock solution	Add 76 $\mu$ L of assay buffer containing 1% of DMSO to obtain a 100 $\mu$ M stock solution.
Handling	After thawing individual aliquots for use, we recommend briefly sonicating the sample to ensure it is fully dissolved and the solution is homogeneous. We do not recommend using the product after subjecting it to repetitive freeze-thaw cycles.
Shipping conditions	The product, as a solid, is stable at ambient temperature for periods of up to a few days and does not require shipping on ice/dry ice.
Important	This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not for human or veterinary use.
